

ABSTRACT

G-IA-191

MASON-DIXON LINE: MILESTONE NO. ---(193)

1767 (mound), 1902 (monument)

Salisbury, Pennsylvania vicinity

Public/private

Milestone No. ---(193) and its small mound of earth and ^{loose}stones mark Mason and Dixon's 179th mile from the "Post Marked West in Mr. Bryan's Field," the approximate 176th mile from the northeast corner of Maryland, the latter being the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland. ^{It}is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 11 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the site was originally surveyed and marked with a cairn), and 1902 on the west side (when the new monument was set in the center of the mound during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, replacing the original wood post by then no longer in evidence. The mound, also in excellent condition, measures about 9 feet in diameter by about 2 feet high. On the national and state levels, No. ---(193) and its mound are significant primarily as being among the some 248 markers still visually defining the West Line. Locally, as among the some 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. --- (193) and its small mound of earth and stones mark Mason and Dixon's 179th mile from the "Post Marked West in Mr. Bryan's Field" the approximate 176th mile from the northeast corner of Maryland, the latter being the beginning of their 230.228-mile West Line. The monument was a new dressed marble post with a low pyramidal top when added to the mound in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in excellent condition, unaltered, firmly in place; measures 10 inches square by about 11 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when the site was originally surveyed and marked), and 1902 on the west side. The mound, also in excellent condition, is presumably the remains of an original cairn, measures about 9 feet in diameter by about 2 feet high at the center, where the monument was set as a replacement of the original wood post no longer in place.

The area here is ^{one of} the densely wooded westerly slopes of Chestnut Ridge, with no houses in sight. The site is within Election District 3 of Garrett County, MD, and Elk Lick Township of Somerset County, PA; ^{and downhill from} about 1850 feet west of the preceding monument, ^{about 4100 feet west of US 219 (Salisbury Road/T-346);} No. --- (192) on the ridge; ^{about 2 miles southwest of the} town of Salisbury, PA; about 2 miles north of the settlement of High Point, MD; ^{in a ferny, stoney deciduous woods} about 15 feet south of the pipeline. It cannot be seen from any road or the pipeline, and is difficult to spot when even closeby because of ^{stones and} the woodland overgrowth, so ^{seems} protected by this obscurity.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill to visually reestablish the Maryland-Pennsylvania boundary, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called magnesian limestone or saccharoidal dolomite; was originally cut about 10 inches square by about 4½ feet long, intended for setting about 1½ feet above ground with the remaining 3 feet for setting into the ground to eliminate the need for a concrete foundation. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are all clear and intact, though all surfaces are covered with lichen and moss. The mound of earth and loose stones is quite camouflaged by leaves and ferns and other large stones all over this mountainside, but on close examination is distinct ^{seems} and intact.

(see Thematic Group National Register nomination form for further descriptions of the monuments set by the Resurvey and the original Mason and Dixon mounds)

STATEMENT OF SIGNIFICANCE

Milestone No. ---(193) and its mound of earth and stones are significant on the national and state levels primarily as being among the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile/^{English} provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The site was surveyed and marked with a cairn in 1767, and the new Cockeysville marble monument added to the center of the remains of the cairn in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as among the some 42 markers along the present Garrett/Somerset-Fayette county boundary, No. ---(193) and the mound are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.
